SUMMARY:

Full stack next.js web developer with expertise in front-end and back-end development, experience in Cross platform web applications.

TECHNICAL SKILLS:

- **FRONTEND –** Next.js, Tailwind CSS, Shadcn, framer-motion, react icons…
- **BACKEND-** Next API Route, Typescript.
- **DATABASE –** MongoDB, PostgreSQL

EXPERIENCE:

Freelancing: 2022-current -

- Utilized React and Next.js to build responsive, high-performance frontends, ensuring seamless navigation and a consistent look and feel across different devices.
- Implemented state management using Context API and Redux for efficient data flow and application scalability.
- Developed robust backend APIs using Next.js API routes to handle server-side logic, database interactions, and secure data handling.
- Integrated RESTful APIs for efficient data exchange between frontend and backend, adhering to best practices for authentication, authorization, and error handling.
- Implemented Resend for reliable and scalable email services, managing email notifications, verification processes, and user communication effectively.

PROJECTS:

[link] BOOST – A ecommerce website to buy stuff toys.

Tech Stack: Next.js, Tailwind CSS, Next API, MongoDB, Mongoose, TypeScript, Node Mailer…

- Frontend development using Next.js, Tailwind CSS, Next Auth.
- Backend development using Next API Route, MongoDB and typescript.
- Database management utilized MongoDB as the database to store.
- User authentication using Next Auth.
